

“Write three words you think of when you think of Science.”

A word cloud shaped like a large drop, containing various terms related to science and safety. The most prominent words are 'water', 'fire', 'wood', 'lab', 'science', 'physics', 'chemistry', 'explosions', 'leak', 'gunpowder', 'earth', 'fun', 'scientist'. Other visible words include 'wood', 'leak', 'fire', 'water', 'science', 'physics', 'chemistry', 'explosions', 'gunpowder', 'earth', 'lab', 'fun', 'scientist', 'water', 'fire', 'wood', 'lab', 'science', 'physics', 'chemistry', 'explosions', 'leak', 'gunpowder', 'earth', 'fun', 'scientist'. The words are arranged in a way that they fit within the shape of the drop, with some words being larger and more central than others.

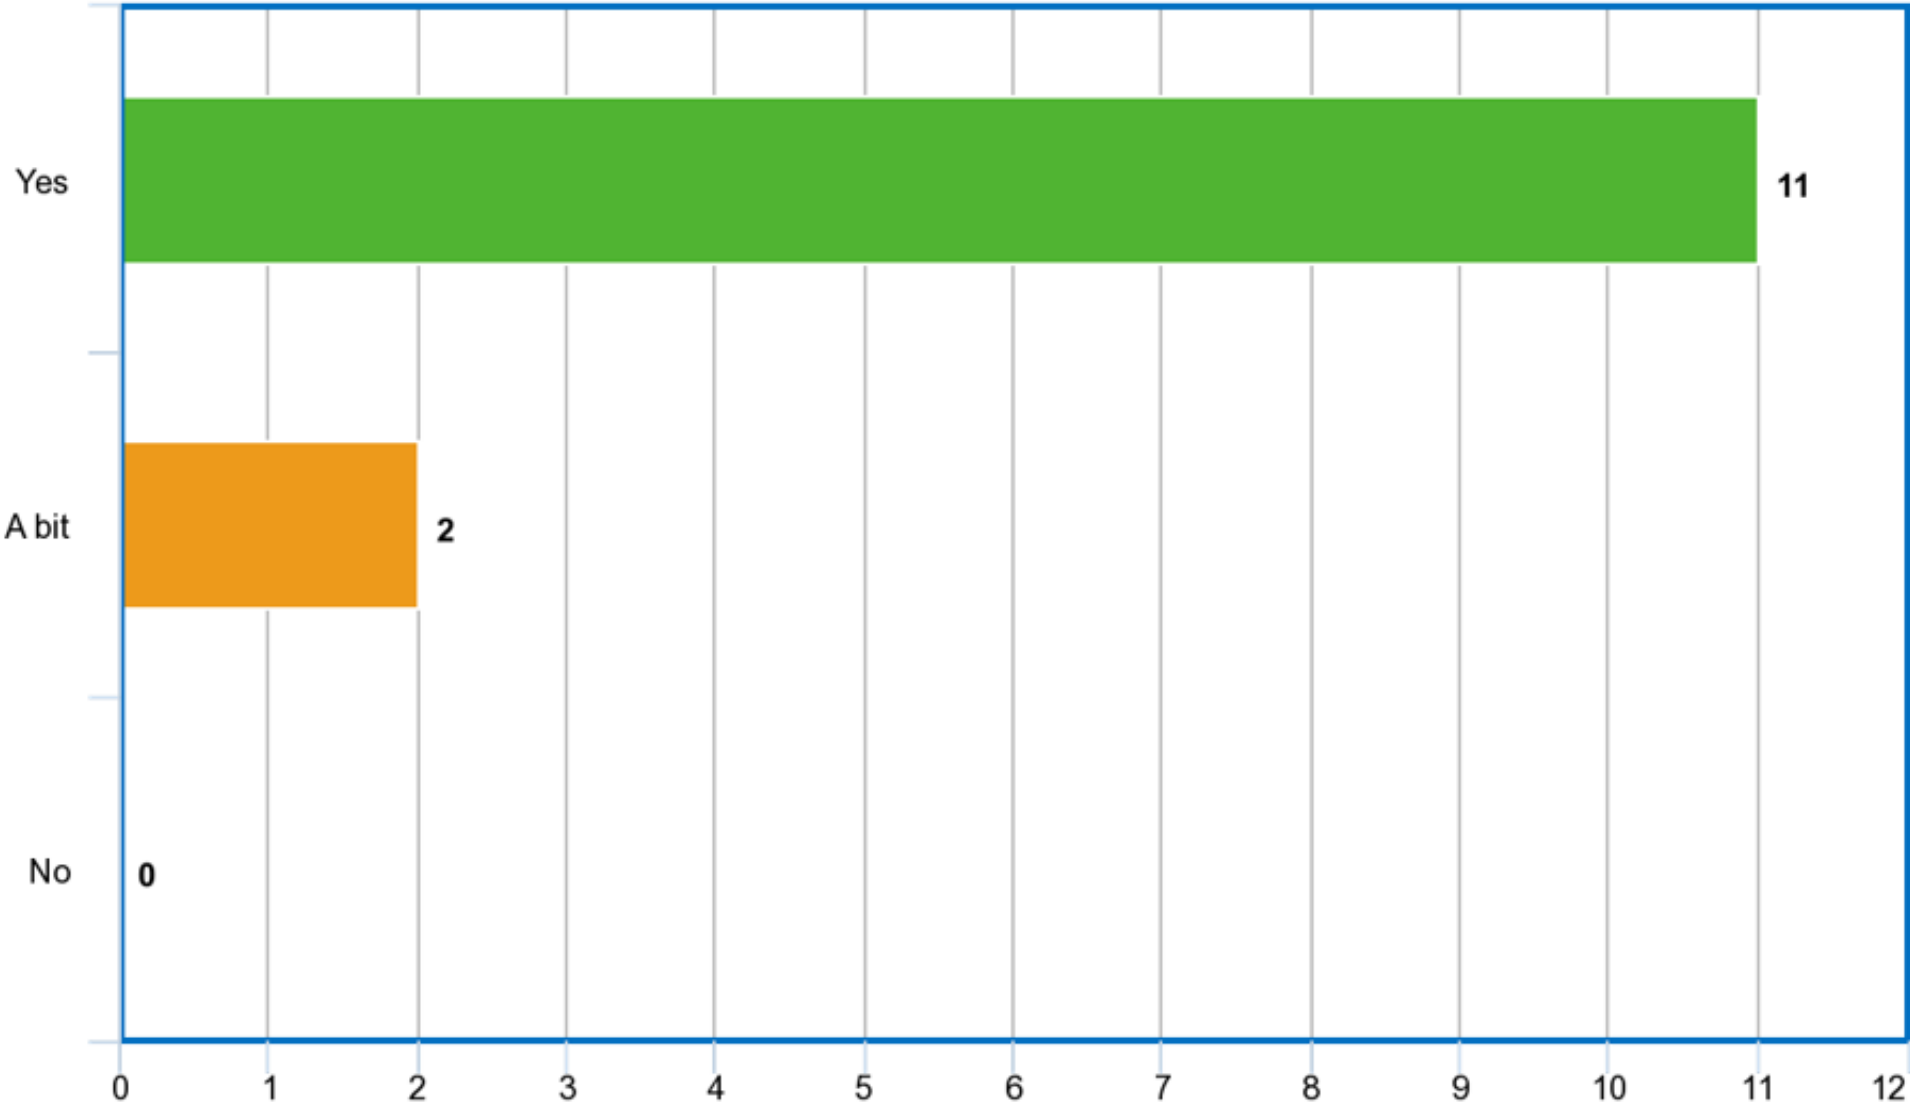

I know how to do a science experiment (Choughs):

I enjoy my science lessons at school (Choughs):

My teacher enjoys teaching science (Choughs):

Why is it important to learn about science? (Choughs)

- You can learn about the whole wide world! (EYFS)
- Maybe so that when you grow up you might be a scientist
- So when you grow up you can be a scientist
- To be a scientist
- To learn new stuff
- It teaches you about floating and sinking
- You learn new things
- Teaches you how to make fire
- Learn how to make explosions
- Because it is school work and we do that

What has been your favourite science lesson why? (Choughs)

- When we did the whole wide world (EYFS)
- Making a bed for a dog. I can remember fake dog wee.
- When we used fake dog wee
- When we mixed juices together to make different colours
- Floating and sinking
- Water
- When you get to do stuff
- The dog wee
- The food colouring
