

# St Levan Student Council

We have held elections in Puffins and Choughs Class this week. Everyone who wanted to apply wrote and read out a speech for why they felt they would make an excellent councillor. The speeches were very powerful with everyone demonstrating how much they care about each other and the whole St Levan community. Well done to everyone who took part and we are so pleased to hear how many people are going to try and secure a seat next term. Once the votes were counted, we were amazed by how close the final numbers were!

Our Spring Term Student Councillors are:

**Oliver**  
**Oscar**  
**Flora**  
**Astrid**  
**Saskia**  
**Ellie**

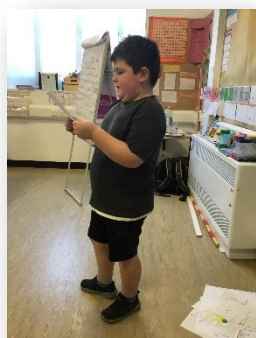

Below are the winning speeches from the two eldest members of this Term's Council.

I think I should be a Student Councillor because I'm a great organiser when it comes to many subjects and I can be emotionally intelligent and understand people. I have interesting and important ideas and I care, not only about my friends, but everybody and my teachers. I want St Levan to become a more powerful school and I love my school a lot. I will sort out problems well and will always look after school's property. I will try my best to make things awesome!

Saskia

Being a Student Councillor has been my dream since Year 1 and I still haven't been it so it would be more than amazing if I got it. I would like to be a Student Councillor because I have ideas that I want to share because this school is amazing and before I leave, I want to make a difference to it. When I moved here, I felt really shy but everyone made me feel welcome and that I belonged: this is home. I want home to be the best it can be. I will try and solve any problems and listen and keep you updated. I have put my heart into this so please elect me for Student Councillor.

Ellie

Sharing our speeches  
with the rest of the class.

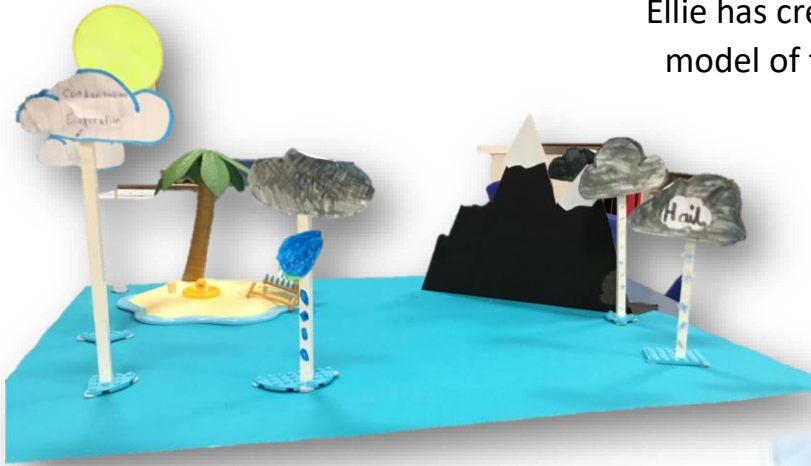

Over the next two weeks our newly formed school council will be busying themselves creating a Global celebration week for us all at St Levan.

# Home Learning in Puffins Class!

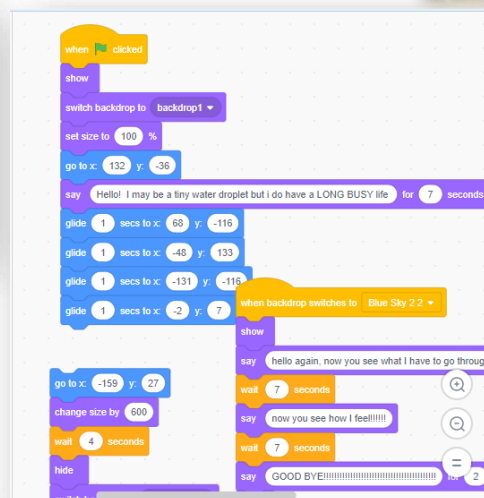

Ellie has created an amazing model of the water cycle!

Nathan has created a video and used various software to animate the different stages!

Morvey has used some clever Scratch coding to great effect!

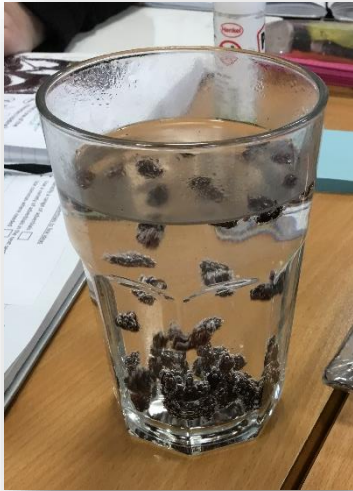

Sadie's miniature terrarium uses the water cycle to keep the plants inside alive!

Lots of Puffin's have been talking about their brilliant ideas for how they will show the water cycle – we cannot wait to see them all!

Science this week:

## What are solids, liquids and gases?

“In this experiment the solid raisins are surrounded in carbon dioxide gas from the fizzy lemonade which is making them rise to the surface where the bubbles of gas pop and consequently sends the raisins back to the bottom where it starts again until there is no gas left.”

The highlight: observing what happens when foaming shaving gel is exposed to air!
